## EXPERIENCE 6+ YEARS

### FRONTEND DEVELOPER

Caw Studios

#### Jan 2023 - Present

- Implemented responsive and accessible web designs with React and Next.js, ensuring a seamless user experience across all devices.
- Integrated back-end functionality and created APIs using C# and Razor Pages to support front-end features and enhance data interaction.
- Collaborated with cross-functional teams to deliver high-quality software solutions using React, Next.js, and Angular within tight deadlines.
- Optimized application performance and load times through efficient coding practices and leveraging modern web technologies.

### FRONTEND DEVELOPER

Helical IT Solutions

#### June 2018 - Jan 2023

- Enhanced functionality and user experience of BI web application modules through efficient management, development, and updates using React.js.
- Engineered a full-stack application leveraging Node.js, effectively bridging server-side and client-side technologies to improve overall application performance and scalability.
- Developed custom JavaScript libraries to address specific project needs and utilized CoffeeScript and Backbone.js to maintain and enhance legacy codebases, optimizing development workflows.
